PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience building scalable backend systems and AI-powered applications. Skilled in Python, Django, AWS, and modern LLM frameworks, with experience designing cloud-native solutions, automating deployments, and developing production-ready software.

SKILLS

Programming Languages: Python, JavaScript/Node.js + TypeScript

Tools & Technologies: AWS Cloud, Docker, Django, ReactJS, PostgreSQL, Redis, Celery, Selenium, Postman, LangChain

EXPERIENCE

Software Engineer, Techstack Digital

March 2022 - Present

- Developed 20+ REST APIs using Django REST Framework for enterprise SaaS applications serving thousands of users.
- Built AI-powered applications using Langchain, implementing RAG pipelines, tool-using agents, and multi-step LLM workflows for contextual reasoning and external data integration
- Debugged & resolved production issues using Sentry, CloudWatch logs, and metrics
- Improved system reliability through automated testing using PyTest and Selenium
- Contributed to CI/CD workflows in GitHub Actions for automated deployments

PROJECTS

AI Assisted Cloud Infrastructure Design Tool — CloudNooe (Final Year Project)

[View Project](#)

- Designed and developed an AI-powered cloud infrastructure design platform that converts natural language prompts into deployable cloud architectures.
- Built agentic LLM workflows using LangChain, enabling dynamic tool selection, multi-step reasoning, and API orchestration.
- Developed a drag-and-drop infrastructure designer using React Flow, allowing users to visually create and modify cloud architectures.
- Implemented Redis caching to reduce API response times and improve application performance.
- Containerized and deployed the application on AWS ECS using Docker, ensuring scalable and reliable deployments.
- Integrated cloud provider APIs to generate infrastructure configurations based on user requirements.

ACHIEVEMENTS

- Co-founded and pitched [CloudNOOE](#), securing selection for incubation in IoBM University's SSKIC Cohort 5.
- Served as the Web Development Co-Lead, GDSC at my University.
- Contributed multiple pull requests to [Zulip](#) (22k+ GitHub stars)

EDUCATION

UIT University

Bachelor of Science in Computer Science

Relevant Coursework: Data Structures & Algorithms, Computer Organization & Assembly Language, Object Oriented Programming, Software Engineering I, Information Security
